

DON BOSCO SENIOR SECONDARY SCHOOL

Report on Picnic to Museum of Solutions (MuSo)

Classes: IV and V

Venue: Museum of Solutions, Parel

Date: 4th November 2025

The students of Classes IV and V went on an exciting and educational picnic to the Museum of Solutions (MuSo) at Parel on 4th November 2025. The visit was filled with curiosity, fun, and hands-on learning experiences.

At MuSo, children explored various interactive zones that encouraged creativity, critical thinking, and collaboration. They engaged in a range of innovative activities and exhibits that helped them learn by doing. In the Play Lab, students enjoyed experimenting with science-based installations like air tunnels, balancing blocks, and water flow models, which made learning about physics and motion fun and easy. The Discover Lab introduced them to concepts of environment and sustainability through immersive exhibits on water, pollution, and ecosystems. In the Make Lab, children got creative by designing and crafting simple objects using everyday materials, which encouraged imagination and innovation. The Grow Lab inspired awareness about nature and green living, where students learned about plants, gardening, and composting. They also watched short educational videos that explained real-life problems and solutions in simple and engaging ways. The students thoroughly enjoyed the activities, sharing ideas and learning new concepts in a joyful environment.

The picnic to MuSo was a wonderful blend of learning and enjoyment, leaving the students inspired, curious, and full of new ideas. It was truly a memorable and enriching day for everyone.
